Being an actuarial intern in FTLife has gained deeper insights into the insurance industry and it has helped me significantly with my career planning. I was assigned to the solvency team, and doing equities movement reports every day. I realized that I should not be afraid to ask questions. If you ask, you will learn more and improve yourself.

— Year 2, CHAN Tsz Ching

What I have learnt from this internship is how to use Prophet, such as model running and spreadsheet checking to see if there is any error inside. I have also used the skills learnt from school such as Excel formulae, VBA and some actuarial skills in Excel. I think these skills are important to be an actuary. My supervisor gave me a lot of tasks which were quite difficult for me. Although I had spent much time to read and understand, I could handle them eventually. There are three important things to be an intern: be patient, be careful and ask supervisor for help if facing any problem.

— Year 3, TONG Ho Wang Wilton
