

TEACHING AND COMMUNITY EDUCATION

Sustainability education is the foundation for preparing students to see the connections between what issues need to be addressed, the values that influence why we should act, and the skills that provide the insights on how to act.

SELECTED RESEARCH

The Research Centre for ESG (CESG) was created in 2020/21, to facilitate academic research, conduct knowledge transfer, and educate the community about environmental, social, and governance (ESG) and business sustainability. Currently, the research of the Centre is funded by the Institutional Development Scheme of the Research Grants Council (RGC) of Hong Kong. The four research components are: (1) Incorporating social returns into the ESG integration process, (2) Improving KPIs of ESG reporting for listed firms, (3) Measuring consumer satisfaction on ESG performance, and (4) Enhancing the effectiveness of strategic corporate communication on ESG effort for listed firms.

TEACHING AND COMMUNITY EDUCATION

CENTRE FOR TEACHING AND LEARNING (CTL)

The Teaching and Learning Enhancement Section, established in 2015 under the Centre for Teaching and Learning, is dedicated to supporting the teaching and learning community at HSUHK. We partner with faculty, students and administrators to foster student learning and inspire effective and innovative teaching throughout the University.

(i) HSUHK Innovation Project Competition 2025 – ESG@HSUHK

The theme for the 2025 HSUHK Innovation Project Competition is ESG@HSUHK, focusing on the three pillars of Environmental, Social, and Governance issues. ESG is increasingly recognised as a key framework for ensuring sustainable development, addressing global challenges, and fostering a more equitable and resilient society. The strategic partners included the Centre for Innovation and Entrepreneurship (CIE), the Institute of Youth Sustainability and Leadership (IYSL), and the Business Executive Club.

ESG Exploratorium: Designing a Sustainable Campus

Students engage in interactive discussions and collaborative activities, gaining insights into pressing sustainability challenges by brainstorming innovative solutions.

From Green Buildings to Scenic Routes: An Eco Tour Experience

An engaging ecological tour, where students take a brief walk uphill to the picturesque “Hang River”, and delve into the diverse ecological interests and natural beauty that the area has to offer.

TEACHING AND COMMUNITY EDUCATION

The ESG Journey: Enhancing Our University's Sustainability Practices

The talk examined the importance of Environmental, Social and Governance (ESG) criteria in sustainable business practices.

Tour to "The Henderson"

The session provided students invaluable insights into how Henderson Land's initiatives align with global sustainability goals and enhance community's wellbeing.
