Mr Alan Li Pui-leung
李沛良先生

Mr Alan Li Pui-leung is a distinguished industrialist who founded TK Group (Holdings) Limited in 1983, and currently serves as its Chairman and Executive Director. He has been demonstrating bold innovation, a relentless pursuit of excellence and unwavering determination, and has led the Group to become one of the world's leading one-stop provider partners of precision moulds and injection moulding solutions, with its business now spanning more than 20 countries and regions.

In the 1980s, amid Hong Kong's manufacturing boom, Mr Li focused on long-term success, firmly believing that only perseverance and continuity could lead to true accomplishment. After just four years of skill-building, capital accumulation, and networking, he established TK Group — its Chinese name symbolising broad inclusivity and continuous flow. From the outset, he laid strong foundations for corporate governance and culture by prioritising scientific management and internationalisation.

Entering the 21st century, Mr Li distilled the philosophy of “shared development and mutual enhancement” from his extensive experience in enterprise growth, reflecting his far-sighted vision.

He established additional production bases in the Pearl River Delta, driving significant growth in both scale and capability, integrating environmental protection, social responsibility, and industry advancement into the company's core operations.

He introduced innovative incentives to unite managers and investors in shared purpose and success, alongside a clear three-tier governance structure (group, factory, department) that values consensus-building over isolated expertise in his enterprise, enabling centralised decision-making, flexible execution, and efficient collaboration. He recruits talent widely and invests in comprehensive training. Through these efforts, he has nurtured personal and professional growth among employees, cultivated a valuable talent pool for the industry.

Today, TK Group has evolved into a leading high-end manufacturer of precision injection moulding solutions, spanning diverse fields such as precision moulds, automotive components, and medical device accessories. Its products form integral parts of the core supply chains of numerous renowned global brands, earning the company widespread recognition as an exemplar

of Hong Kong manufacturing's transition from traditional models to high-quality, innovative development. Far from resting on these achievements, Mr Li remains dedicated to refining operations and management, advancing modern governance practices and propelling high-quality, organic growth to reach new heights in precision and advanced manufacturing.

Mr Li upholds the aspiration of “taking from society and giving back to society” and the belief that “young people are the future of society”. For decades, Mr Li has devoted himself enthusiastically to public service. He holds numerous key positions, including Honorary President of the Hong Kong Young Industrialists Council; Executive Vice-Chairman of the Kowloon City District Development Caring Fund Limited; Chairman of the Shenzhen Guangming Area Industry and Commerce Federation; Chairman of the Hong Kong Students' Visit to Hong Kong — Pearl River Delta Industries' Programme; and Founding Chairman of the Hong Kong Pok Low Association Group Limited. Through these roles, he has actively promoted collaboration across various sectors and organisations and facilitated the joint development of youth in the Greater Bay Area.

Mr Li firmly believes that nothing is difficult in the world for those who set their minds to it. He actively fosters collaboration among government, academia, and industry to provide young people with diverse development opportunities, including vocational training, internship programmes, and academic seminars. Deeply committed to the traditional virtue that “of all virtues, filial piety comes first”, Mr Li promotes a spirit of dedication, care for the elderly, and giving back to society among the younger generation in his hometown and beyond.

Mr Li strongly identifies with HSUHK's educational philosophy of holistically nurturing future leaders and has long provided staunch support for the University's development. In addition to serving as an Honorary Vice-Chairman of The Hang Seng University of Hong Kong – Foundation, he has participated in and supported many key University events and campus development projects, including the 2019 HSUHK FunD Run and the “Uniquely Common” Concerts in 2023 and 2025.

Mr Li's outstanding contributions to industrial and commercial development and social affairs have earned him numerous accolades, including the Hong Kong Young Industrialist Award in 2003, the Outstanding Person of Shenzhen Machinery Industry in 2004, and Shenzhen Person of the Year by Southern Metropolitan Daily in 2013. In 2024, he received the Hong Kong Mould and Die Industry Distinguished Achievement Award. In 2025, he was awarded the Medal of Honour by the HKSAR Government and the EY Entrepreneur of the Year 2025 – Hong Kong/Macau.

Chairman, Mr Alan Li Pui-leung has made indispensable contributions to the growth of Hong Kong's manufacturing industry, devoted himself wholeheartedly to social service and youth education, and provided steadfast support for the development of HSUHK. To recognise his distinguished contributions, I present Mr Alan Li Pui-leung to you for the conferment of Honorary University Fellowship.
